Club Competition Update

Each member will have the opportunity to shoot each distance twice throughout the year. This will allow all members the ability to compile 2 daily aggregates for each distance. Final totals will be calculated by adding together each member's best daily aggregate for each range.

Each range will be 1 x 10 shot + 2 sighters and 1 x 11 shot + 2 sighters.

The justification for this is to allow all members to post a score even if they happen to miss a club shoot. For instance, A few members regularly attend other clubs prize meetings. With a bit of planning, if they are aware they will miss out on a particular distance, they still have 1 more opportunity to record a score for the club competition.

With all distances being pre-determined, it will remove any confusion as to what will happen each day. Some members prefer the shorter distances, some the longer distances. With this program all distances are covered twice.

For every shoot including plonk shoots, it is a requirement that ALL participating members arrive at the range by 7.30am. with every shooter helping with the setup, we can be shooting by 8.00am.

Throughout the year there is a fair bit of range maintenance required which is usually left to just a handful of members. It would be greatly appreciated if ALL members could participate in working bees. The committee will post a request for participation at various times throughout the year providing as much notice as possible.

Regards,

Ian McDonald
